

Four in a Row Spin (Minus 2 Facts - Review)

Materials for this 2 player game

Paper clip and pencil (to be used for the spinner)

10 counters (one kind/color for each partner, ex. nickels and pennies)

Directions:

Partner 1 - Using the paper clip and the pencil, spin the spinner. Subtract 2 from the number on the spinner. Cover that number with your color counter.

Partner 2 - Using the paper clip and the pencil, spin the spinner. Subtract 2 from the number on the spinner. Cover that number with your color counter.

Repeat this process. The first person to cover 4 counters in a row (or use all 10 of his/her counters) wins the game.

Note: If your subtraction answer, or "difference" is already covered, you cannot cover anything and you lose your turn.

1	3	6	2
5	7	4	8
8	6	1	5
2	4	7	3
